To reduce the risk of electric shock, this mirror has a polarized plug (one blade is wider than the other). This plug will fit into a polarized outlet only one way. If the plug does not fit fully into the outlet, reverse the plug. If it still does not fit, contact a qualified electrician to install the proper outlet. Do not change the plug in any way.

MAINTENANCE

Your lighted mirror is designed for household use and is virtually maintenance-free. No lubrication is needed.

If cleaning becomes necessary, disconnect the mirror from the power source, allow to cool and wipe exterior with a cloth. Clean mirror surfaces with a glass cleaner. Do not light until you are certain mirror is completely dry to protect against electrical hazards.

If any abnormal condition occurs, unplug the lighted mirror, allow it to cool, and return it to an authorized service center for repair.

Handle cord carefully to prolong its life; do not jerk or strain at plug connections, or wrap cord around mirror for storage. This could cause damage to the cord and the mirror could short circuit. To store mirror, coil cord loosely.

STORAGE

Disconnect from electrical outlet. BE SURE DIRECT SUNLIGHT DOES NOT STRIKE MIRROR WHEN LEFT UNATTENDED; REFLECTED SUNLIGHT CAN CAUSE FIRE. Allow to cool to room temperature before storing. Place in cool, dry area out of reach of children, where mirror will not be damaged.

**WARNING:
IF YOU THINK
THE POWER IS
OFF WHEN THE
SWITCH IS OFF,
YOU'RE WRONG.**

KEEP AWAY FROM WATER

Everybody knows that electricity and water are a dangerous combination. But did you know that an electrical appliance is still electrically live even if the switch is off? If the plug is in, the power is on. So when you are not using your appliances, keep them unplugged.
