MAINTENANCE

Your lighted mirror is designed for household use, and is virtually maintenance-free. No lubrication is needed. If cleaning becomes necessary, disconnect the appliance from the power source and wipe exterior with a damp cloth. Clean mirror surfaces with a glass cleaner. If any abnormal condition occurs, unplug the lighted mirror, allow it to cool, and return it to an authorized service representative for repair.

STORAGE

If mirror is not in use, disconnect from electrical outlet. **BE SURE DIRECT SUNLIGHT WILL NOT STRIKE MIRROR WHEN LEFT UNATTENDED;** reflected sunlight may cause fire. Allow to cool to room temperature before storing. Place in cool, dry area out of reach of children, and where it will not be damaged. Handle cord carefully for longer life. Do not jerk or strain at plug connections or wrap cord around mirror for storage. This could cause the cord to become damaged and short-circuit. To store mirror, coil cord loosely, starting at the appliance, and place cord in large loops next to mirror or secure cord with a twist tie.

**WARNING:
 IF YOU THINK
 THE POWER IS
 OFF WHEN THE
 SWITCH IS OFF,
 YOU'RE WRONG.**

KEEP AWAY FROM WATER

Everyone knows that electricity and water are a dangerous combination. But did you know that an electric appliance is still electrically live even if the switch is off? If the plug is in, the power is on. So when you are not using your appliances, keep them unplugged.
