USER MAINTENANCE
Your curling wand is virtually maintenance free. No lubrication is needed. Keep all vents and openings clear of dirt and dust. If cleaning becomes necessary, disconnect the curling iron from the power source, let it cool, and wipe exterior with a cloth. If any abnormal condition occurs, unplug the curling wand, allow it to cool, and return it for repair to an authorized service center only. No repairs should be attempted by the consumer.

CAUTION
NEVER allow the power supply cord to be pulled or twisted. Never wrap the cord around the curling wand. Damage will occur at the high flex point of entry into the curling iron, causing it to rupture and short circuit. Inspect the cord frequently for damage. Stop use immediately if damage is visible or if unit stops or operates intermittently.

STORAGE
When not in use, your appliance should be disconnected, allowed to cool, and stored in a safe, dry location out of reach of children. Do not jerk or strain cord at plug connections. Do not wrap the line cord around the appliance. Allow the cord to hang or lie loose and straight at the point of entry into the appliance.
