

Quick GEMS

by CONAIR™

the
Shimmer
that you share™

Quick Gems™ works on all hair types and lengths. Mix and match jewel colors, shapes, and sizes for your own individual style. The Quick Gems™ styling tool comes with 30 decorative gems in assorted shapes and sizes. 2 disks are included.

Before you begin, insert 2 AAA batteries (not included) in the back of the tool. Then, follow these simple steps to bejewel your hair!

Step 1: Separate a 1/4" thick section of hair and comb through. Make sure hair is dry and free of styling product.

Step 2: Insert hair into jewel transfer slot, holding the end of the hair to securely apply jewel.

Step 3: Push and hold ON button to transfer jewel onto hair. Hold the ON button until the jewel snaps into place.

Do not move the Quick Gems™ unit until jewel is secured onto hair section.

Release the ON button when the jewel snaps into place. Jewel cartridge automatically moves to the next jewel.

Jewels can be reused. Simply remove from hair and reload into cartridge.

TO REMOVE THE JEWELS FROM YOUR HAIR

1. Grasp both sides of the jewel and gently pull the two sides of the jewel apart, releasing spring tension slowly.
2. Slide the jewel down and off the strands of hair. Be careful not to stretch the spring between the jewels.

HOW TO RELOAD THE JEWELS INTO THE CARTRIDGE

1. Open the protective cover over the jewel cartridge and slide each jewel into an empty slot in the cartridge.
2. Close the protective cover.

HOW TO ALTERNATE CARTRIDGES

1. Open the protective cover over the jewel cartridge.
2. Remove disk from the Quick Gems™ styling tool and snap desired disk into place. Close protective cover before use.

NOTE: Jewels supplied in this unit are specifically designed for use with this product. Do not use jewels other than those supplied, as they can cause the Quick Gems™ unit to jam.

CHOOSING SPECIFIC JEWELS

If you want to apply only one or two specific jewels to your hair, you can rotate the cartridge clockwise until the desired jewel is directly under the jewel transfer slot.
