OPERATING INSTRUCTIONS

Congratulations on your purchase of the InfinitiPRO by Conair™ Detangling Shower Accessory. Your set is manufactured from quality materials and will give you years of reliable use in your bathroom.

INSTALLING THE DETANGLING SHOWER ACCESSORY

Product shown is for demonstration only and will vary from product to product.

Step 1: Remove the old showerhead by turning it counterclockwise (Fig. 1). Wipe off any debris from the threaded pipe. Wrap the Teflon® tape (included) clockwise around the threaded pipe (Fig. 2).

Step 2: Install the diverter valve on the pipe. Turn clockwise with your hand to tighten. **Note: Do not over-tighten** (Fig. 3). Then, install the new wall-mount showerhead to the forward-facing diverter opening by turning it clockwise and tightening by hand. If additional tightening is required, place protective cloth on the swivel nut and tighten with a wrench (Fig. 4).

Step 3: Attach the ridged nut end of the hose to the downward-facing diverter valve opening (Fig. 5). Attach the other end of the hose to the detangling accessory (Fig. 6) and turn clockwise to tighten by hand.

Note: The ridged nut end of the shower hose contains a permanently installed device to protect from the backflow of water which is standard for all showerheads. To function properly, the ridged nut end of the hose must be connected to the diverter.
